DETAILED ACTION

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance:

Examiner has included the entire body of patents pertaining to snoop filters (also known in the art as a coherency filter) that are not commonly assigned.

Of all the references cited, only two make a specific mention of a snoop (coherency) filter that is comprised of a cache.

The first; Gaither, US PG PUB 2002/0073281, states in paragraph 41 that a coherency filter is a data-less cache. Gaither further states that when a processor makes a memory request, the coherency filter stores all the information about the cache line except the data itself (coherency information, tag, processors which have a copy etc). Gaither makes no mention of what is done when lines are replaced in one or more processor caches, nor does Gaither distinguish between processor action types. Since at least one of these limitations is present in independent claims 1, 10 and 14. The present application is found allowable over Gaither in view of these limitations when combined with the other specified limitations.

The second; Phelps, US Patent 5,966,729, discloses an interest cache located within the snoop filter (figure 4 element 324). Phelps discloses the means of updating the interest cache is performed via a page scrubber as detailed in column 7 line 49 through column 8 line 29. This teaches away from applicants disclosed invention, since updates are generated via an internal mechanism, and not in response to transaction

performed by a processor. Therefore applicant's invention is found allowable over Phelps.

Since these two references are the only prior art of record that disclose a snoop filter comprised of a cache, applicant's claimed invention is found allowable over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Paul A Baker whose telephone number is (703)305-3304. The examiner can normally be reached on M-F 10am-6:30pm.
